SPECIFICATION

Tape width	5mm/8mm/10mm (Depends on the width of shuttle)	Max.winding speed	300 rpm
Max.final coil.O.D	60 mm (Max)	Memory Capacity	999 steps
Min.final coil.I.D	14mm (Min)	Supply voltage	AC 220V (50Hz)
Max.finalcoil height	45 mm (Max)	Spread Motor	Stepping motor
shuttle DIA.	150mm	Main Motor	1/2HP DC Motor
Power Soruce	AC 200V +10%:50/60Hz	Net Weight	90KGS
Packing Dimension	78 x 78 x 125mm		

Product Introduction of Toroidal Taping Machine:

This equipment adopts Taiwan CNC controller system control, cooperates with high-torque stepping motor synchronous wiring, suitable for winding various types of tapes and can save 0-999 different data.

FEATURES:

1. It adopts Taiwan controller and inverter drive, which has the characteristics of energy saving, low noise, less maintenance and long life.
2. Multifunctional microcomputer design, easy data setting, and the data can be saved for more than one year when the machine is turned off.
3. Can set the storage tape length.
4. Parameters can be edited according to the product (inner diameter, outer diameter, height, wire diameter, number of turns).
5. There are two types of winding mode, forward and reverse, and angle winding can also be set.
6. 0-999 sets of steps to set the capacity, the storage and winding speed can be set separately, and different winding directions, winding angles and segmentation angles can be selected.

ADVANTAGES:

1. The Digital Core Taping Machine has strong stability and can work for a long time
2. There is no middleman, and one piece is also a wholesale price
3. R&D and production by the manufacturer, and dedicated inspection for shipment
4. Many years of equipment focus on a strong after-sales team
5. Provide guidance for on-site debugging of equipment Digital Core Taping Machine

APPLICATION:

A high speed Digital Core Taping Machine for application of insulation tape to wound coils. it is best suited to toroidal inductor, toroidal transformer, toroidal current transformer, toroidal coil, toroid choke coil, power inductors, power magnetics, UPS inductor, converter inductors, heavy toroidal core,etc.

The coil is placed by an operator on a rotating spindle, and the machine automatically applies the required number of turns of insulation tape, secures the end of the tape with a wiping action, and ejects the coil from the machine. It's an accurately and reliability Digital Core Taping Machine. it is used for wrapping the insulation tape on the toroidal core and windings. Digital Core Taping Machine is designed to operate with a wide variety of insulation tapes, including Kapton, Polyester, PEN, PVC, PPS, and most other woven and non-woven types.

PRACTICAL APPLICATION :

TRAINING CUSTOMER TO OPERATE WINDING MACHINE :

1.All service engineers with 10 years experience are gotten special technology training, who can deal with various breakdown problem.

2.Guide the user to use accurately and how to maintain the Digital Core Taping Machine .

Provide free consultation about production process technology of Digital Core Taping Machine .

3.In order to guarantee the machine used normally, we'd have training on how to operate, use and maintain our product by English manual, video, guiding on line.

PACKAGING:

Packaging Material: Carton/Wooden case with foam inside.

1.General package(Paper carton or plastic bag): For small equipped parts for Digital Core Taping

Machine, Package it with form and pack paper to guarantee unbroken during the transport.

2.Wooden case package: For larger scale Digital Core Taping

Machine ,we have special skilled

carpenter, who would make the proper wooden case with exact thickness, density,length. The up arrow ↑marked on the outer wooden case. Buffer material would be put in the wooden case to prevent crack and shock.

FACTORY:

We-GREWIN INDUSTRIAL GROUP is expert in winding machines lines for 28 Years. Our Grewin have ISO9001:2015,CE approvals,Machines'Patents,"high-tech enterprises"by the government.
