4.Fan Winding Machine use two spindle synchronous design, selection of high-power phase motor, making a thick wire around the low-speed torque when larger and more stable. Coupled with high-power stepper motor ,when it rotates will get higher accuracy, so that customers to feel save time,save worker,high production.

5.Stator Winding Machine suitable for all kinds of motor stator winding, a variety of ceiling fan stator, pole number stator, locomotives generators.

Advantages:

It'll be faster and higher reliability.

This machine is mainly used for the ideal equipment for the outer winding of the ceiling fan stator coil. During the winding process, the winding, arranging, turning, forward and backward actions can be completed automatically. It can also achieve large wire diameter winding arrangement, stable performance, and can save 7-15% of enameled wire.

APPLICATION:

This machine is mainly used for the ideal equipment for the outer winding of the ceiling fan stator coil
